May 12, 2010

Workers Compensation

Carthage, NC, Next policy year beginning July 1, 2010, Moore County has the lowest workers compensation experience modifier for all the County participants in the NCACC Workers Compensation Pool. This means that the amount of actual losses sustained in a prior 3 year period are substantially less in both number and severity than would statistically be expected for a County the size and makeup of Moore.

Furthermore Moore County has had this distinction for the prior 2 years and the 2010-11 term will make it 3 years in a row. This speaks highly of the efforts of the County Manager, Risk Manager, and staff from the standpoint of development, as well as execution of sound Risk Management policies. It is through these kinds of results that make a workers compensation self insurance program successful.

Should you require additional information contact Dawn Spivey at the Human Resources Department or Eli Arroyo-Allen, County Managers Office.

Congratulations!
